6 Tips for Employees to Work From Home Efficiently

#FlattenTheCurve

The Right Resources
Utilize resources for optimal collaboration & communication such as Sharepoint, Microsoft Teams, & Video Messaging apps.

Designate a Space for Work
As much as you might want to work directly from the comfort of your own bed, it will not be productive in the long-term

Set Yourself Working Hours
Set some rigid working hours where you shut everything off & focus on the work that needs your attention.

Get Some Structure in Place
Structure your workday by planning which tasks are priority & how many hours you are going to spend on each job.

Always Communicate
Supplement emails or texts with frequent video & voice interactions depending on what type of discussion you are having.

Use Flexibility Wisely
You know better than anyone when you do your best thinking & working so take advantage of it.

EXECUTING RAPID GLOBAL MOBILITY
